

CWA Bargaining Update for Tuesday, June 10, 2008

The CWA/IBEW 2213 Regional Bargaining Committee spent time this morning working on a counter proposal which will be presented to the Company. Before the proposal can be completed the Unions need additional information that has been requested from the Company. The parties met this afternoon. The Unions requested clarification from the Company pertaining to Verizon's health care and prescription drug proposals, as well as on other issues raised by the Unions in earlier bargaining sessions. The Company provided some but not all of the information. Negotiations are concluded for today and scheduled to resume tomorrow morning.
